

VS1522 - Wireless LED Display with PA Speaker

Key Features:

- Viewing Distance of 150'
- Two-Line Alphanumeric Display Format
- Alternate Time Display
- Built-In Wireless Speaker
- Pre-Programmed Voice Messages and Alert Tones
- User-Programmable Voice Messages*
- Wall or Ceiling Mount

The **VS1522 Wireless LED Display with PA Speaker** is designed to provide voice and tone announcements, text messaging and time display.

The VS1522 supports 8 activation codes (ID's) for individual activation or membership activation in up to 7 separate groups. Creating groups provides the ability to activate multiple devices using a single transmission from a main paging controller, such as the **VS4800**.

The **VNS2271** option allows the user to store custom voice messages and alerts into the **VNS2200** wireless audio/visual controller's memory. This option is optimal for unique alerts or pre-determined emergency voice messaging.

The VS1522 can alternate between text display and time display modes. When the time display mode is activated, the VS1522 displays the time unless a text message is received. Once the text message lifetime expires, the VS1522 reverts back to displaying the time.

Options, Accessories and Complementary Products:

Part Number	Description
VNS2255	External Antenna
VNS2271	Expanded Memory (8.5 Minutes of Stored Audio @ 10 kbps/second, Divided into Equally-Timed Memory Slots)
