

WPRP-I575 - Wireless 900 MHz Repeater

The WPRP-I575 Wireless 900MHz Repeater is designed to effectively enhance the range of 900 MHz transmissions without wiring or programming. The WPRP-I575 is optimal for installations where the signal from the 900 MHz transmitter does not have sufficient power to reach the 900 MHz wireless receiver.

Key Features:

- Signal Synchronization Processing
- Easily Adaptable for Indoor and Outdoor Use
- Easy and Low-Cost Installation

Options, Accessories and Complementary Products:

Part Number	Description
Other	Battery Back-Up

Specifications:
