### Key Features:

- Starting Price at \$500
- Fast and Easy Installation
- Weekly Bell Schedule With Up to 48 Bells Per Day
- Download/Record Audio Files to Play as Your Bells
- Battery Backup Option
- Add a Second Speaker to Maximize Audio Coverage

The **Visiplex Stand-Alone Bell System** is a cost-efficient solution to install a wireless bell system at any facility. The system supports up to 2 speakers with a bell schedule that can store up to 48 bells per day.

The VNS2200 controller connects directly to an electrical outlet from its Power port, then directly to the speaker from its Speaker port, allowing for a fast and easy installation process.

The VNS2200 controller can store 4 custom weekly bell schedules. This allows the user to easily change the bell schedule for weeks with different bell schedules, such as holidays, half-days, test days, etc.

The VNS2200 controller can store custom WAV audio files with its expanded memory option. Any audio, such as bell tones, music, or voice messages can be stored to be played as bells or as pre-recorded messages in emergency situations.
