

## Emergency Two-Way Radio to Speaker System

### Key Features:

- **Activate Nearby Speakers Set to a Specific Frequency and Tone**
- **Easy Setup with Minimal Installation Requirements**
- **Provides Instant Mass Communication**
- **Supports Unlimited Speakers**
- **Page a Specific Speaker, a Group of Speakers, or All Speakers**
- **Low-Cost System**

**The Visiplex Emergency Two-Way Radio to Speaker System** is a cost-efficient solution to install an Emergency PA system at any facility.

When the two-way radio is active, the nearby VNS2200 controllers will receive the audio and play it from the attached speakers. The system supports an unlimited amount of speakers.

The VNS2200 controller connects directly to an electrical outlet from its Power port, then directly to the speakers from its Speaker port, allowing for a fast and easy installation process.
