CT154
WIRELESS WALL MOUNTED BUTTON
Instant Audio/Visual Alerts

Simple Operation, User-Programmable Alerts, Easy Installation

The CT154 Wall Mounted Panic Button is a compact, wireless transmitter that can instantly notify staff members when help is needed or initiate a facility-wide alert during emergency situations. With its four button design and optional color coded keypad, the CT154 offers four independent, user-programmable event activations that can correlate with standard emergency color codes. It can be used in a stand-alone configuration that can initiate audio/visual emergency alerts, activate pre-programmed voice messages through wireless PA speakers, control wireless beacon lights or send a detailed text message to wireless LED message boards. When being used as part of a Visiplex paging base station, the CT154 can also send an SMS text message to a staff member's cell phone, activate a dial-out event to play a pre-programmed voice message, and provide supervision monitoring capabilities to ensure reliable operation.

Equipped with a built-in, long lasting Lithium battery, the CT154 wall mounted panic button will provide years of maintenance-free operation while offering wireless functionality supervision and low battery alerts.

CT154 KEY FEATURES

AUDIO ALERTS
Activate PA Messages

VISUAL ALERTS
Control Beacon Lights and LED Message Boards

ALERTS ANYWHERE
Detailed Phone or Pager Text Alerts

LONG RANGE
Up to 300' Range

FULLY SUPERVISED
Periodic Status Alerts to Monitoring Base Station
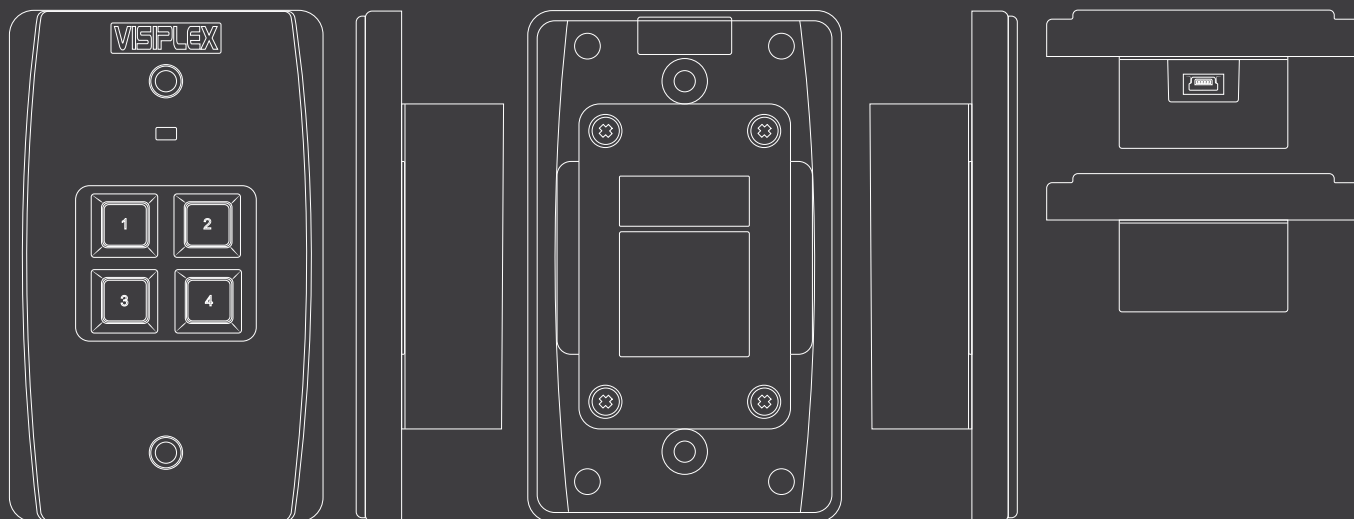

LOW MAINTENANCE
