

TS-ADA-051 - LAN to RS-232 Adaptor

The **TS-ADA-051 LAN to RS-232 Adaptor** is designed to provide serial connection between two remote serial devices over an Ethernet connection.

The TS-ADA-051 is optimal for serial tunneling or applications where COM port functionality is needed. The serial tunneling allows two previously non-networked and isolated devices to send and receive data and operate with existing installed software applications on an Ethernet network, eliminating the serial cable.

The TS-ADA-051 is easy to install locally or remotely through a variety of IP addressing methods.

Key Features:

- **DB-9M Serial Connector**
- **DHCP and Static IP Address Assignment**
- **LED Status for Link and Power**
- **Provides Serial Connection Between Two Remote Serial Devices Over Ethernet Connection**

Specifications:

Dimensions	1.72" x 3.70" x 0.93" (W x H x D)	Operating Temperature	50° - 113°F
Weight	1.15 lbs.	Humidity	5% - 90%, Non-Condensing
Power	12V DC / 0.5A (Using 100-240V AC)	Limited Warranty	One Year Parts and Labor
Color	Black		

*Specifications Are Subject to Change Without Notification
