

VNS2710

WIRELESS CORRIDOR DOME LIGHT Instant, Color-Coded Visual Alerts

User-Programmable Alert Light Color, Operation Mode, Tone, and Duration

The Visiplex VNS2710 Wireless Corridor Dome Light provides a visual indication of calls originating from wireless call buttons or a main paging base station. This helps alert staff of emergency and presence alert statuses. The VNS2710 has user programmable colors, visual signaling modes, tone notification, and overall call duration.

The VNS2710 uses long-lasting, powerful multi-colored LEDs with four separate light bars, each that can be activated in one of four alert modes: Steady, Slow Flash, Fast Flash and Strobe light. Built-in wireless supervision capabilities can provide a full unit status report to an admin base station for reduced maintenance costs.

VNS2710 KEY FEATURES

FULL LIGHT CONTROL
Change color, brightness, mode, tone and duration

ALERT MODES
Pick steady, slow flash, fast flash, and strobe

LONG LASTING LEDs
No maintenance or bulb replacement needed

EASY ACTIVATION
Activate from base station or wireless panic buttons

POWER OPTIONS
Power with an AC outlet or low-voltage POE

FULLY SUPERVISED
Periodic Status Alerts to Monitoring Base Station
