

VNS2720

WIRELESS MULTI-COLORED BEACON LIGHT Wirelessly Activated Visual Signaling & Alerts

User-Programmable Alert Light Color, Operation Mode, Tone, and Duration

The Visiplex VNS2720 Wireless Beacon Light provides visual signaling of calls originating from wireless panic buttons or a paging base station. This helps indicate to staff, visitors, and employees about specific emergency situations, break time statuses, production line alerts, or severe weather notifications.

Each wireless activation of the VNS2720 wireless beacon light provides a user-programmable signaling mode, color selection, tone notification and overall alert duration.

The VNS2720 powerful multi-colored LED's can be activated in one of four signalling modes: Steady, Slow Flash, Fast Flash, and Strobe Light. An optional built-in wireless supervision capabilities can provide a full unit status updates for reduced maintenance costs.

VNS2720 KEY FEATURES

FULL LIGHT CONTROL
Change color, brightness, mode, tone and duration
