

# VNS4400

## WIRELESS SMS GATEWAY

### Automated Alerts for Emergency Situations

*Wireless Monitoring, Alerts Anywhere, Easy Setup*

The Visiplex VNS4400 Wireless SMS Gateway can wirelessly monitor multiple emergency wall stations, wearable panic buttons, and paging base stations to instantly alert staff when help is needed.

This compact gateway is specifically designed to be used with the Visiplex series of wireless panic buttons and emergency wall stations. When a monitored panic button or wall station is activated, the VNS4400 can send out a pre-programmed SMS text message to inform administrators, nursing staff, or caregivers of what the emergency is and where.

When used in conjunction with a Visiplex base station, the VNS4400 can wirelessly receive SMS event information and act as a remote LTE modem to send the SMS message to designated subscribers.

## VNS4400 KEY FEATURES

### INSTANT SMS ALERTS

Sends automated, pre-programmed SMS messages within seconds

### WIRELESS MONITORING

Monitors an unlimited number of wireless emergency wall stations and wearable panic buttons

### EASY SETUP

An active micro SIM card and USB or AC power source are all that is needed
