AlertWave

VS1504 - Wireless Alphanumeric LED Display

The VS1504 Wireless Alphanumeric LED Display is designed with easy time and message viewing to accommodate a wide variety of application environments.

The VS1504 supports 6 activation codes (ID's) for individual activation or membership activation in 5 separate groups. Creating groups provides the ability to activate multiple devices using a single transmission from a main wireless paging controller, such as the **VS4800** or **VNS5100**.

The VS1504 can be set to default time display mode. In this mode, the VS1504 switches to alphanumeric message mode only when a text message is received. When the text message lifetime elapses, the VS1504 reverts back to time display mode.

Time Display Mode

Key Features:

• **Two-Line Alphanumeric Display Format**

• **Text Scrolling**

• **Alternate Time Display**

• **Wall or Ceiling Mount**

• **Supports Multiple Display Effects**
