

DESKTOP PAGING MICROPHONE

Commercial-Grade Microphone for Voice Paging

The VisiPlex VS3018 Desktop Paging Microphone is a commercial-grade solution designed for seamless integration with VisiPlex wireless paging base stations. Ideal for live public address announcements and voice message recordings, the VS3018 ensures clear and reliable communication in demanding environments.

This desktop microphone features a Push-to-Talk (PTT) switch with selectable Momentary and On modes for user-friendly operation. Built with a durable, anti-vibration base and an adjustable gooseneck, the VS3018 provides stable, hands-free functionality with minimal background noise. Its balanced audio output delivers high-quality voice transmission, making it an excellent choice for warehouses, corporate offices, schools, hospitals, and other commercial or institutional facilities.
