

WPRP-HP

WIRELESS PAGING REPEATER

High-Power Voice & Data Repeater

Provides an Extended Coverage Area with Desktop Installation

The WPRP-HP is a Wireless Repeater that provides extended RF coverage to locations where the main paging transmitter signal is too weak or can't be received. The WPRP-HP is capable of handling voice and data paging formats, with the ability to receive and transmit on two different frequencies.

The WPRP-HP can be used as a wireless repeater to improve paging coverage in applications such as wireless Public Address messaging, wireless two-way intercom communications, time synchronization, emergency alerts and more.

The WPRP-HP Wireless Repeater comes with a built-in high power transmitter, radio receiver, two magnetic mount antennas, repeater control logic and a programming port for configuration and data monitoring.

WPRP-HP KEY FEATURES

SENSITIVE RECEIVER

Built-in receiver can take a weak signal and extend its range to reach where it's needed

MULTIPLE FORMATS

Works on a wide range of UHF frequencies. Works with both digital and analog paging formats

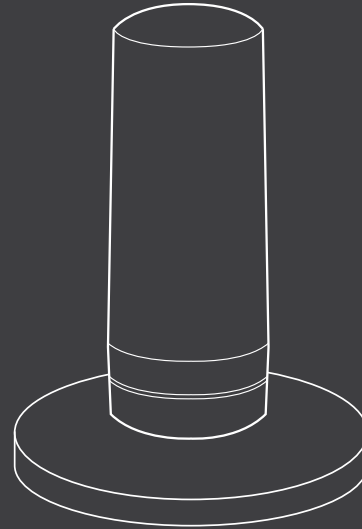

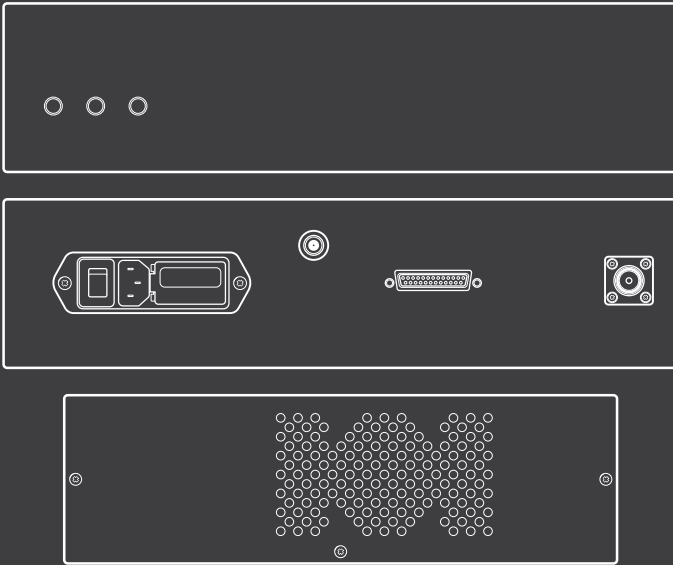

HIGH POWER OUTPUT

The high-power repeater is a perfect fit for medium to large installations that need extended coverage
